CURRICULUM VITAE

After 11 years of public hospital experience as internal medicine specialist in Gdansk (Poland) and allergist in Montpellier (France) in Professor Bousquet's department, she has contributed with success for more than 30 years to the development of different drugs in many therapeutic areas in Pharma Industries (Schering-Plough, MSD and UCB). Recently she has created her Medical Consulting office in France and joined the MASK (Mobile Airway Sentinel network) and POLLAR (Impact of air POLLution on Asthma and Rhinitis) projects.

Doctor Czarlewski conducted numerous programs related to allergy, from basic research (role of adhesion molecules in the inflammatory process) to clinical trials leading international program on prevention of allergy in children. In addition, she managed Medical Affairs of anesthesiology, oncology, infectious diseases and rheumatology. Finally, she was Director of Pharmacovigilance and Medical Information and Head of Medical and Business Integrity at UCB France.

In the growing importance of health economics culture, her center of interest is an improved dialogue between doctors and patients suffering from chronic diseases, based on humanistic approach of educational e-tools dedicated to patients, helping them to manage their health condition efficiently with optimal cost of medical care in the fast-changing ecosystem.
